Can anyone tell me what diameter & thread the exhaust pipe mounting bolt holes in the barrels of a 1/s blind head flyer should be (that's for a siamesed exhaust pipe with three hole mounting - left hand bolt + middle stud + right hand bolt) ? I need to helicoil a new thread into some very stripped holes !!

Many thanks for any advice,

Paul Wilson

5/16" bsf .. although it seems that people have used everything but woodscrews, judging by some of the blocks we have!

Richard,

many thanks for the info - i think the woodscrew must have paid a visit here sometime in the past.....

Cheers,
